Could a new solar project help remote Arctic communities transition to green energy?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter. The pilot project could help remote Arctic communities transition to green energy.

Why do solar panels work in Isfjord Radio?

The solar panels also benefit from the "albedo" effect, the reflective power of snow and ice, as well as low temperatures that improve their efficiency. On the flipside, the region is plunged into total darkness from early October until mid-February, which makes it impossible for Isfjord Radio to completely give up fossil fuels.

Are solar PPA prices on the rise?

The report uncovered several critical findings: Solar PPA Prices on the Rise: P25 solar PPA prices across the nation increased by 4% in the third quarter, marking a 21% year-over-year growth. These price hikes were particularly prominent in specific Independent System Operators (ISOs) like PJM, SPP, and ISO-NE.

Are wind PPA prices stable?

Wind PPA Prices Remain Stable: Wind P25 PPA prices in North America remained relatively steady, with only a 1% decrease during Q3. However, this followed a notable 13% increase in Q2, which was attributed to a supply shortage across various ISOs.
