

Solar power generation electricity sales license

What are gas and electricity supply licences?

The gas and electricity supply licences set out the conditions that all energy suppliers must adhere to in order to supply energy to domestic and non-domestic consumers. We have compiled a range of guides to help suppliers and other stakeholders navigate and understand the obligations of energy suppliers.

Do I need a licence to generate electricity in the UK?

If you intend to generate, distribute or supply electricity in the UK you will need to determine whether a licence or exemption is required, unless authorised to do so by a licence (or otherwise exempted). Definitions of what constitutes 'generation', 'distribution' and 'supply' can be found at sub-sections 4(4) and (5) of the Electricity Act 1989.

What are the requirements for an electricity generation license?

To obtain an electricity generation license, an investor must satisfy the following general conditions according to the Electricity Laws: having feasible projects or schemes for electricity activities and valid application dossiers for the grant, amendment or supplementation of electricity activity licenses.

How do I obtain a power generation license?

To obtain a power generation license for projects with installed capacity from 1MW to less than 3MW, the developer must apply at the People's Committee or authorized Department of Industry and Trade of the relevant province or city where the project is located.

What is a gas supplier licence?

A Gas Supplier Licence can allow supply to either domestic and non-domestic premises, or non-domestic premises only. This allows the licensee to participate in the transmission of electricity for the purpose of enabling a supply to be given. This licence is granted to successful bidders under our offshore electricity transmission regime.

Do I need a power generation license in the Philippines?

According to Circular No. 36/2018/TT-BCT (a power generation license will be required for projects generating more than 1MW), see Sample Laws and Regulations for an overview of the Philippines' regulatory framework.

According to the International Energy Agency, there are some circumstances where solar photovoltaic (PV) is now the cheapest electricity source in history. ⁴ This is because the price of solar has fallen sharply around ...

There are three general types of solar thermal energy: low-temperature used for heating and cooling, mid-temperature used for heating water, and high-temperature used for electrical power generation. Solar ...

Solar power generation electricity sales license

In order for homes and businesses to use cleaner, greener energy, more renewables - such as solar power and wind power - will need to be connected to the electricity grid. To do this, we will need to upgrade the ...
