

Solar power suppliers Senegal

Who produces energy in Senegal?

Energy is produced by private operators and sold to the Senelec energy corporation. According to a 2020 report by the International Energy Agency, Senegal had nearly 70% of the country connected to the national grid. Current government strategies for electrification include investments in off-grid solar and connection to the grid.

Who buys electricity in Senegal?

Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel. The rest is mostly coal and hydroelectricity.

How can solar power plants benefit Senegal?

The project estimates that more than 400 jobs in the towns benefit from the existence of the new solar power plants in Senegal. Because Senegal mainly relies on imported oil for electricity, solar power plants offer a more reliable and sustainable green energy source that costs less.

How many solar photovoltaic plants will be built in Senegal?

Two new solar photovoltaic plants will be built: the 25 megawatt peak (MWp) Kael solar park in the Touba region in western Senegal and the 35 MWp Kahone solar park in the Kaolack region in central western Senegal.

How many jobs will the new solar power plants create in Senegal?

The addition of the solar power plants form part of the World Bank Group's Scaling Solar program and are funded by the International Finance Corporation (IFC), European Investment Bank and Proparco. The project estimates that more than 400 jobs in the towns benefit from the existence of the new solar power plants in Senegal.

What are the main industries in Senegal?

Another primary industry in Senegal is mining. Senegal's economy rises and falls, following global trends of prices. When export prices fall, farmers suffer the adverse effects since their incomes decrease. Many Senegalese people lack access to education, healthcare and other essential services.
