Solar Foods is a spin-off created from a joint research project on renewable energy between VTT and LUT University, [4] with the idea of creating food from air using electricity dating back to the 1960s. [5] The research team received international publicity when the team announced in 2017 that it has succeeded in making food from the air. [6] The company was founded by ...

The story of Virte Solar started in the late winter of 2015. In the science news, we came across a project by VTT Oulu on investigating the application possibilities of solar film cells. VTT is a technical research centre of Finland. We started to dream of roofing sheets, to which thin film cells could already be bonded at the factory. The solution seemed practical, as there was no need ...
