[ 100W BASIC SOLAR WELL PUMP KIT ] - The basic solar water pump kit, including the necessary 100W solar panel, controller and water pump, and a 16.4 inch cable. [ WIDE APPLICATION ] - The all-in-one complete solar well pump system offers an ideal solution for remote watering without electric power, like the garden, farm irrigation, and tank ...

Since the most common and cost-friendly solar panels are 100-watt panels, you'll need between two and 12 panels. The average is between two and eight panels for standard pumps. Based on the average cost of solar panels (\$1 to \$1.50 per watt), you'd pay between \$200 and \$1,800 for your well pump solar panels--not including installation.

Hence you will need 18 individual 100 watts of solar panels for running the solar borehole pump ( $18 \times 100 = 1.8\text{kW}$ ). For a more cost-effective setup, you will want to use fewer solar panels, and you can use 4 off 500-watt solar panels for the same application ( $4 \times 500 = 2000\text{W}$ ). >
