What is a solar mounting system?

Mounting systems represent an integral and key part of photovoltaic plants. Their function is reliable fixing of solar panels on either roofs or ground in the case of ground installations.

How do I choose the right solar mounting system?

Choosing the correct solar mounting systems is among the most critical decisions considering they have a long lifespan. Most PV modules are designed to be clamped at the quarter-points where the mounting holes typically are. This ensures optimal loading on the module frame and provides maximum static and dynamic load capacity.
