

# Solar systems in Vanuatu

What is Vanuatu's solar power project?

The Government of Vanuatu has set a target of 65 percent power generation from renewable energy by 2020 to increase energy security and fight climate change. With this project, 17,000 households throughout Vanuatu will be supported to access non grid, renewable electricity through solar.

How can Etech solar help Vanuatu?

The sun is a powerful source of renewable energy. We can harness that energy to create a sustainable future in Vanuatu and the world. eTech Solar is accelerating the adoption of quality yet affordable solar technology across Vanuatu to conserve our environment and provide an environmentally friendly and sustainable power supply.

Is solar a good idea for Vanuatu?

Antony Garae, Director of the Vanuatu Department of Energy, said this project is a great boon to his country, where 80 percent of rural residents lack electricity. "Solar is the best solution for these areas not only because of its obvious contributions to climate change mitigation but because fuel is costly and difficult to transport," he said.

With the remoteness of the islands and limited access to centralised utilities, PCS also offers self supporting products suitable for the Vanuatu environment, including solar showers, hand sprayers, personal solar lighting and Lifestraw ...

Vanuatu's geography makes it difficult to create centralized energy systems, which leaves many communities and islands needing electricity, hindering development and forcing the use of fossil fuels for lighting. Only 20 percent of Vanuatu's rural residents have access to electricity.

It is easy to get solar in Vanuatu, as the country has a high potential for solar energy due to its location in the South Pacific. There are several solar power companies operating in Vanuatu that offer installation and maintenance services for both residential and commercial properties.

He made the explanation as the Vanuatu Utilities and Infrastructure (VUI) will be introducing new tariffs for solar Photovoltaic (PV) systems to its customers within the next three months. A private commercial business inquired about which tariff they would be charged.
