

# Solar water tank and bracket

Does a solar water heating system provide 100% hot water?

Because the amount of available solar energy varies throughout the year, a solar water heating system won't provide 100% of the hot water required throughout the year. A conventional boiler or immersion heater is normally used to make up the difference.

Can a solar hot water system be installed on a tiled house?

We can provide you with solar hot water systems designed for a family home. This offers complete solar thermal systems ready to fit onto the roof structure of any tiled house. Each kit will contain equipment parts enabling connection to an existing domestic hot water cylinder or if required please contact us for the latest thermal stores.

Should you install a solar thermal system for heating hot water?

Installing a solar thermal system for heating hot water is a good move for the environment. But before you go ahead, it's essential to know all the facts so you can decide if a solar hot water system is the right choice. First, it's important to point out that there are two types of solar panel systems:

How do you install a solar water storage tank?

Place the bathtub or water storage tank in a sunny location where it will receive maximum sunlight exposure. Connect the solar collector to the storage tank using copper pipes and fittings. Install the pump, heat exchanger, valves, and control systems to complete the plumbing system.

How does a solar hot water system work?

Most solar hot water systems are just designed to provide the hot water you use for bathing, showering and hot taps. Solar water heating systems use panels or tubes, called solar collectors, to gather solar energy. The solar collectors convert the infra-red portion of visible light into heat. They are filled with a mix of water and glycol.

What is included in a solar hot water system package?

Included in the package are flat plate collectors, roof fixing kits to match your tiles, flexible stainless steel tube and connections for both ends. The pumping station included is with built in controller and safety equipment. Complete and ready for assembly. All prices for solar hot water systems are available through this page link
