

Solardrive container power South Africa

Why should you choose the solardrive container power unit?

In remote areas where fuel is difficult or expensive to access, or in situations where you appreciate the silence of solar power, we can recommend considering the SolarDrive Container Power Unit as a supplement for the noisy and polluting generators. Preserving foods after harvest is crucial for the economy and environment.

Can You Power a container with solar power?

You have a container. Let's power it with carbon-free, cost-efficient, plug-and-play, electricity. We are experts in solar energy. Our patent protected solar power units fits perfectly on top of 20' or 40' containers. No more hassle to get cost-efficient, green, energy to your containers. Containers are used for many purposes.

How do solardrive CPS units work?

SolarDrive CPS units are physically interconnected or installed on top of containers by using simple twistlocks or horizontal locks (standard tools in the container industry). Electrical connection is obtained with a standard extension cord to a distribution board or directly to the container demanding power.

Should I buy a container power unit?

When fuel is plenty and cheap this can well be the easiest way to feed the power consumers. In remote areas where fuel is difficult or expensive to access, or in situations where you appreciate the silence of solar power, we can recommend considering the SolarDrive Container Power Unit as a supplement for the noisy and polluting generators.
