These renewable energy targets were established in 2019, when Guam's legislature passed Public Law 35-46, revising their previously legislated goals of up to 25% of electricity sales from renewable energy by 2035 upward. Currently, Guam receives about 13% of its energy from renewable energy, almost entirely solar power.

Initially, in order to boost energy harvesting, we propose a bilayer heterojunction such a way that the CIGS layer is incorporated underneath the perovskite ( $\text{CH}_3\text{NH}_3\text{PbI}_3$ ) ...

Grid-tie solar energy systems coupled with battery storage will become the norm in the renewable energy industry within 3 to 5 years. MRE is the leader in the development and installation of grid-tie with battery storage systems in Guam and the CNMI with ...
