

Solstice energy ltd French Polynesia

What is Solstice Energy?

Solstice Energy is a company that designs, produces and installs high quality Solar electric systems in the Southern California regions. They offer cleaner, more affordable options to utility bills for homeowners and businesses. For a free quote, call 877-400-SOLAR.

Why should I choose Solstice for solar energy?

Solstice is committed to ensuring that your investment in solar energy is protected and your system is future proof. At Solstice, we believe that an investment in solar energy is a guarantee for the future.

What services does Solstice offer?

Solstice offers a comprehensive and worry-free approach that extends beyond basic services to complete financing of your project. Solstice is an established Engineering, Procurement and Construction (EPC) company providing services for on-grid systems of all scales, including Utility, Commercial, and Residential projects.

What is the best part of working at solstice?

"The best part so far is working with the people at Solstice. They are so helpful and they are very attentive. They know who all their customers are and explained everything about their solar farm to us.

Solstice is an international solar energy provider supplying a broad range of solutions tailor made to suit every client's needs. We are proudly one of the few to offer a turnkey photovoltaic solution regardless of the size, location or complexity of the project.

Community solar allows everyone to go solar without installing any rooftop panels or paying any upfront costs. By enrolling in a Solstice community solar project, you'll enjoy all of the benefits of solar energy - including reliable savings on your monthly electricity bill - without the extra hassle or added costs!

Pilier dans la réduction de l'empreinte carbone sur notre planète, Solstice Energies accompagne ses clients dans leur évolution énergétique en leur offrant des solutions énergétiques durables et accessibles ; tous pour améliorer leurs ...

Approximately 6% of primary energy in French Polynesia is generated from renewable energy sources. [1]
Approximately 30% of electricity is generated renewably, primarily Hydroelectricity and solar power. [1]
Renewable generation is concentrated on Tahiti, with other parts of French Polynesia almost entirely reliant on fossil fuels. [2]

Solstice Energy design, install and commission solar photovoltaic and systems for domestic, community and commercial buildings. Solar photovoltaic (PV) is the creation of electricity from light, while solar thermal is
