

Sonnenbatterie 10 price United Kingdom

What is sonnenBatterie 10?

The centre piece of your sustainable household. The sonnenBatterie does not only store energy, it's smart. As an intelligent, backup capable, energy storage system, sonnenBatterie 10 can integrate into any existing PV system on the market. Gain your energy independence now and secure yourself against future energy price increases.

How much storage does a sonnenBatterie provide?

10 kWh of storage would be a good match for the average UK home. If your annual electricity requirement is around 3,650 kWh a year (you can find the actual figure on your electricity bill), that equates to 10 kWh a day which is exactly what the entry-level sonnenBatterie can provide.

What is a Sonnen battery?

Much more than just a battery, the sonnenBatterie enables users to change the way they manage and control their energy. The latest (ninth) generation of the sonnenBatterie series was launched in Q1 2018 throughout sonnen's global markets.

How much electricity does a sonnenBatterie use a day?

If your annual electricity requirement is around 3,650 kWh a year (you can find the actual figure on your electricity bill), that equates to 10 kWh a day which is exactly what the entry-level sonnenBatterie can provide. As long as you fill it each day with a combination of solar and grid electricity, you could run your home off the battery.

What is a sonnenBatterie?

The sonnenBatterie is a fully integrated energy storage solution with perfectly synchronized components including battery modules, integrated bi-directional inverter and smart energy management system - supplied in one easy-to-install box.

Can a sonnenBatterie save you money?

Save \pounds on your electricity bills with solar energy! A sonnenBatterie will allow your home or business to get much more out of your future or existing solar panel system. Adding a sonnenBatterie to a solar PV system could potentially see solar energy usage in your property increase to 75% of your annual energy consumption.
