

South Africa protech energy

What is South Africa's just energy transition?

South Africa's Just Energy Transition (JET) is a critical part of the country's efforts to enhance energy security and reliability while mitigating the impacts of climate change, reducing dependence on fossil fuels, and promoting sustainable economic growth and development.

How is energy used in South Africa?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Why is energy storage important in South Africa?

Experts say that widespread energy storage is vital to expanding the reach of renewables and speeding the transition to a carbon-free power grid - this is key to helping reduce South Africa's reliance on fossil fuels as it seeks to transition to clean energy.

What is South Africa's just energy transition investment plan (JET-IP)?

In 2022, South Africa released its Just Energy Transition Investment Plan (JET-IP) to outline the priorities and investments required to achieve its decarbonization commitments in a just manner that ensures workers and communities are not negatively impacted by the transition away from coal.

What does the 2013 Integrated Resource Plan for electricity mean for South Africa?

Coal is the mainstay of the South African energy system, meeting around 70% of primary energy demand. The 2013 Integrated Resource Plan for Electricity however sets out a long-term diversification of the power mix and moves towards lightening the carbon f

Why is Power Africa supporting a provincial electrification plan?

Power Africa is supporting the Department of Mineral Resources and Energy and its service providers to complete provincial electrification plans to drive funding allocations for municipal electrification projects.

Protech Khuthele Holdings Limited is a South Africa-based holding company. The Company, through its subsidiaries, is engaged in providing contracting, geotechnical laboratory and survey services, and readymix concrete services. The Company operates in three segments, including Contracting, Geotechnical laboratory and Readymix.
