What is Virgo Energy?

Virgo Energy is a leading energy company in South Africa dedicated to addressing the challenges of the country's power utility grid. Our mission is to offer reliable alternatives and improve the energy landscape.

Why should you join Virgo Energy Group?

Be at the forefront of driving change in Sub-Saharan Africa's energy sector by spearheading the development, ownership, and operation of sustainable and clean energy projects. ViGo Energy Group is passionately committed to amplifying our influence in the advancement of clean energy.

Why should you choose Virgo Energy?

At Virgo Energy, we are committed to making renewable energy more accessible and affordable for you by providing components directly to you at wholesale prices. In the past, solar installations have often been associated with significant financial investments.

What is South Africa's just energy transition (JET)?

In 2021, South Africa's Just Energy Transition (JET) was officially launched during COP26. The International Partner Group (IPG), consisting of the European Union, France, Germany, the United Kingdom, and the United States, made a landmark commitment of US\$ 8.5 billion.

We are committed to supporting South Africa's efforts to mitigate climate change and reduce dependence on fossil fuels by promoting energy efficiency and the adoption of renewable energy sources. Frameworks for decentralized renewable energy systems are being developed through a UNIDO-led initiative, aiming to reduce emissions and enhance ...

South Africa's renewable energy sector is booming, with new projects surging to an impressive 133GW, more than double the amount from just a year ago. This remarkable growth was revealed in the 2024 South African Renewable Energy Grid Survey (SAREGS), a crucial annual report that tracks the development of renewable energy projects across the ...

Top 4 largest South African Companies in the Energy sector by Market Cap. This is the list of the largest public listed companies in the Energy sector from South Africa by market capitalization with links to their reference stock and industry.

The World Bank has agreed to extend \$1bn to South Africa to help the government's energy security goals and the transition to a low carbon economy. The development policy loan is expected to help with restructuring ...

Electricity production in South Africa by source 2010-2023. South Africa has a large energy sector, being the third-largest economy in Africa. The country consumed 227 TWh of electricity in 2018. [1] The vast majority of South Africa's electricity was produced from coal, with the fuel responsible for 88% of production in 2017. [2] South Africa is the 7th largest coal producer in ...

South Africa's energy sector is still shaped by the country's apartheid history and by post-apartheid's political, social, and economic forces (Baker et al., 2014; Marquard, 2006). Given South Africa's high coal endowment, the resource supported energy intensive economic growth by fueling the national energy-sector and other industries (e.g ...

The World Bank has agreed to extend \$1bn to South Africa to help the government's energy security goals and the transition to a low carbon economy. The development policy loan is expected to help with restructuring of the power sector through the unbundling of state-owned power utility Eskom, as well as encouraging private investment in renewable energy.

South Africa needs to transition into renewable energy in a way that continues to protect the country's energy availability, Eskom chairperson Dr Mteto Nyati told the Joburg Indaba on Wednesday.
