

South Georgia and South Sandwich Islands new energy storage

Why is the South Georgia & South Sandwich Islands marine protected area undergoing a review?

The South Georgia and South Sandwich Islands Marine Protected Area is undergoing its second five-yearly review. Recovery of baleen whales coupled with climate change, means managers must be alert to alternative future ecosystem states. Areas of little economic interest within the MPA remain data poor with little monitoring.

Who owns South Georgia and the South Sandwich Islands?

The United Kingdom claimed sovereignty over South Georgia in 1775 and the South Sandwich Islands in 1908. The UK Overseas Territory of South Georgia and the South Sandwich Islands (SGSSI) was formed in 1985, whereas previously it had been governed as part of the Falkland Islands Dependencies.

What is the future of South Georgia & the South Sandwich Islands?

The future management of South Georgia and the South Sandwich Islands For more than two centuries, exploitation of the wildlife of South Georgia and the South Sandwich Islands has provided revenue, albeit interrupted as serial overharvesting has destroyed stocks, in some instances taking species to the verge of extinction (see Introduction).

What are the priority recommendations to the South Georgia & South Sandwich Islands MPA review?

Priority recommendations to the South Georgia and South Sandwich Islands MPA Review (see main paper for more details) include: 1. Implement the revised CCAMLR management framework for the krill fishery, with initial priority emphasis on the winter period at South Georgia.

Should there be a no-take area around the South Sandwich Islands?

Hence, I propose that within the 200 nm mile Maritime Zone around the South Sandwich Islands, a no-take area where fishing is not allowed should be designated. Protecting all the waters used by baleen whales within this area would also offer umbrella protection for the whole ecosystem, with almost complete trophic linkage.

Could a unilateral closure of the South Sandwich Islands help CCAMLR?

A unilateral closure of the South Sandwich Islands by GSGSSI could help CCAMLR to focus on other areas and issues that need resolution .

South Georgia and the South Sandwich Islands are a collection of exceptionally remote islands in the Southern Atlantic. Although considered as one entity they represent two physically distinct island groups, with the South Georgia cluster ranging between 560 and 800km west of the South Sandwich Island arc (Figure 1).

The South Georgia and South Sandwich Islands Marine Protected Area (SGSSI-MPA) is one of the world's largest MPAs, covering an area of 1.24 million km² (an area 5 x larger than the UK). It was established in

South Georgia and South Sandwich Islands new energy storage

2012 with the aim of ...

South Sandwich Islands, group of actively volcanic islets in the South Atlantic Ocean, north of the Weddell Sea and 470 miles (760 km) southeast of the island of South Georgia. They extend for 190 miles (305 km), occupy 120 square miles (310 square km), and are covered with glaciers. Until 1985 they were included within the Falkland Islands (Islas ...

The latest version of the Government of South Georgia & South Sandwich Islands Biosecurity Handbook is now available online. The Handbook details the procedures which are in place to help reduce the risk of harmful non-native species and disease entering the Territory, along with the steps in place to detect them and limit their spread should they arrive.

South Georgia and South Sandwich Islands new energy storage

South Georgia and the South Sandwich Islands (SGSSI) comprise an Overseas Territory of the UK. For over two centuries, the islands and surrounding waters were subject to serial over-exploitation of commercially valuable marine species. First seals, then whales, and later some species of fish were harvested to virtual economic extinction.

Our Goal: Building Future Resilience By 2025 all day-to-day power generation at our main station will be from renewable energy and all our operations will be single-use-plastic free #SGSSI...

South Georgia is situated 800 miles SE of the Falkland Islands. The main island of South Georgia is approximately 170 km long and between 2 and 40 km wide and occupies an area of 3,755 km², more than half of which is permanently ice covered. The coast is rich in wildlife and home to huge colonies of penguins, seals and albatross.
