

# South Sudan rezon energy

Can solar power be transformative in South Sudan?

When stability is achieved, smaller-scale systems could become a major component of a vibrant domestic and export clean energy economy. Renewable energy, particularly solar power, has the potential to be transformative in South Sudan for several reasons.

Why is South Sudan facing a serious energy crisis?

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of producing energy (World Bank, 2016).

How much electricity does South Sudan use per capita?

According to the International Energy Agency (IEA), South Sudan averaged only 39 kilowatt hours of electricity consumed per capita for the entire year of 2014. This put South Sudan alongside Haiti at the bottom of the IEA 2016 national rankings.

Should South Sudan invest in solar energy?

To enhance the sustainability of a solar initiative, and to ensure that South Sudanese benefit from the outset of a transition, new investment in renewable energy should be coupled with a significant commitment to fund local capacity building and training programs in solar energy.

Is oil the right form of energy for South Sudan?

However, oil is not the right form of energy to meet South Sudan's rising energy demand due to (1) high costs (e.g. high costs of fuel and generator repair), (2) sporadic diesel fuel supply, (3) inefficiency and unsustainability and (4) detrimental health impacts on people and environment.

How does lack of electricity affect business in South Sudan?

Specifically, over 75% of firms surveyed in South Sudan complained that lack of energy hinders business operation. Second, lack of electricity drives up costs as businesses and families try to produce their own power, which is extremely expensive.

South Sudan's energy sector is deeply embedded in the dynamics of the conflict, from the economy's near total dependence on oil production and the accompanying patronage systems to the reliance on imported diesel for access to electricity. Creative solutions could help South Sudan break this cycle, and in at least one area - renewable ...
