

Spi energy solar4america Saudi Arabia

Where does SPI invest?

SPI maintains global operations in North America, Australia, Asia and Europe and is also targeting strategic investment opportunities in fast growing green energy industries such as battery storage, charging stations, and other EVs which leverage the Company's expertise and substantial solar cash flow.

What's new at Solar4America?

We are very excited to meet this important milestone for our company and offer the best domestic-made solar module products to our customers to meet the increasing demand for American-made modules. The Solar4America module manufacturing facility now produces 700MW with capacity ramping up to 2.4GW in 2023.

How many solar modules does S4A have?

Currently S4A has production capacities for 2023 on an array of modules including 330W/60 cells and 410W/72 cells, 410W/108 half cut cells all black modules for the residential market and 410W/72 cells (silver) and 550W solar modules for industrial and commercial markets.
