

Can Sri Lanka develop ground-mounted solar?

Sri Lanka has launched a tender for 165 MW (AC) of ground-mounted solar, accepting applicants to develop solar plants up to 5 MW in size, connected to one of 20 selected substations across the country. The winners will sign 20-year power purchase agreements (PPAs) with the state-owned Ceylon Electricity Board.

Will Sri Lanka develop 165 MW solar plants?

Sri Lanka's Ceylon Electricity Board has kicked off a tender for the development of up to 165 MW(AC) of ground-mounted PV projects on a build, own, operate basis. The solar plants can range in size from 1 MW to 5 MW and will be connected to one of 20 grid substations outlined in the tender documents, subject to capacity at each grid substation.

Can solar power be used in Sri Lanka?

Solar power is one of the cheapest sources of energy and Sri Lanka has strong solar resources. However, ground-mounted solar power requires a lot of land and given Sri Lanka's high population density, agriculture needs, and declining forest cover, land access can be challenging. "Floating solar can potentially work well with hydro power generation.

Could Sri Lanka's power mix benefit from solar power?

Sri Lanka's power mix could potentially benefit from greater solar power generation during the day and a switch to hydro in the night. Seasonally, floating solar could produce power during the dry months while throughout the monsoon rains hydro could play a larger role in the energy mix.

How much solar power does Sri Lanka have in 2022?

Sri Lanka recorded 714 MW of solar capacity by the end of 2022, according to the International Renewable Energy Agency. This content is protected by copyright and may not be reused. Should Sri Lanka add large-scale floating solar plants?

Adding large-scale floating solar plants would not only make electricity greener and affordable but improve Sri Lanka's competitiveness. Photo credit: The Solar Energy Research Institute of Singapore (SERIS) Sri Lanka needs to add an estimated 11,000 MW to its power grid within the next two decades to meet growing demand.
