

St Kitts and Nevis solar prices in sa

How much solar energy does St Kitts use?

In St. Kitts and Nevis, the solar resource averages 5 kWh per square meter. Solar energy is already being used for grid-powered induction lighting and street lights along roadways. A 7 MW waste-to-energy power plant is planned to come online on St. Kitts in 2015.

Does St Kitts and Nevis have a national energy policy?

Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

How much does electricity cost in St Kitts & Nevis?

The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

How much energy is lost in St Kitts & Nevis?

Reports indicate that in St. Kitts and Nevis, higher losses are largely attributable to nontechnical losses such as unmetered consumption, leading to losses that are higher than the U.S. Energy Information Administration's average transmission and distribution loss of 6%. By comparison, the U.S. Energy Information Administration reports an average transmission and distribution loss of 6%.

What is the largest solar project in the Caribbean?

In September 2019, the Federal Government in collaboration with SKELEC signed an agreement with Leclanché SA - one of the world's leading energy storage companies based in Switzerland - to construct the largest solar generation and energy storage project in the Caribbean.

At a brief but historic ceremony on Wednesday, June 15, 2022, to kick off the SOLEC Leclanché Solar Farm, Jomo Williams, General Manager of the St. Kitts Electricity Company (SKELEC), hailed the initiative a significant step towards achieving clean renewable energy for the Federation.
