What makes a good solar panel packaging design?

A good solar panel packaging design makes it easier to transport solar panels on a pallet, and provide excellent protection to the panels during transport. WINAICO's solar boxes are so tough that one can withstand the weight of a ton, roughly the weight of a pallet full of solar panels, for an hour.

How much does a full solar module pallet weigh?

As part of our internal design criteria, we would stack a full solar module pallet, which weighs more than 700 kg, on top of an empty box. A qualified packaging design would maintain perfect form for 5 minutes to confirm the empty box does not crumple under the weight of a full pallet.

Are solar panel pallets reusable?

Adjustable, collapsible, reusable pallets engineered for solar panels. PVpallet's solar panel pallets, Series X and Series X.L, fit a range of panel sizes. These pallets are purpose-built with added features like protective sidewalls, a steel-reinforced base, and an efficient load management system.
