

What are Star Plus Inverter Batteries?

STAR PLUS Inverter batteries are specially designed to be used with home and industrial inverters where traditionally flooded tubular batteries are typically used. Most inverters have chargers with high-ripple content that reason shedding of active materials in the battery plate.

Are StarPlus batteries eco-friendly?

Starplus batteries are eco-friendly and are capable of being completely recycled, thereby minimizing wastage, and living up to their responsibility towards the environment. We use the quality material with advanced technology to give the best to all our customers.

What is a long lasting tubular battery?

A long lasting tubular battery is a lead-acid battery designed to have a longer lifespan than regular lead-acid batteries. These batteries are commonly in use in applications where it requires a reliable and long-lasting power source, e.g., backup power systems, solar power systems, and inverter systems.

What is a tubular battery?

A tubular battery is a lead-acid battery designed to have a long life and provides robust performance. Low-maintenance tubular batteries require regular maintenance to ensure their longevity and efficiency. The battery requires minimal care to provide excellent services over an extended period.

What is a strong built tubular battery?

The strong built tubular battery is a lead-acid battery that withstands high temperatures, deep discharges, and harsh environmental conditions. The battery derives its name from the design of the positive plates, made up of a series of tubular structures containing a special paste.

What are heavy duty tall tubular batteries in Nigeria?

The heavy duty tall tubular batteries in Nigeria have an ultra-low rate self-discharge system and designed cycle life C10 discharge. Heavy duty tall tubular batteries can deliver high currents and have a longer lifespan than other types of batteries.

A tall tubular battery is larger in peak than a quick tubular battery and a flat plate battery, though lesser in width. A tall tubular battery offers a constant backup system than other lead-acid batteries.

The new starplus solar tubular inverter battery combines the latest advance technology with exceptional performance to provide optimum efficiency and reliability with a long-life battery ...

Star Plus 220Ah 12V Tubular Battery Highlights: Batteries designed for deep cycle inverter application.

Excellent charge acceptance; Long life-high pressure casting machine used for positive plate; Long shelf-life no fresh charge required up to 2 months from date of manufacture; Factory-charged batteries for ready to use condition

Star Plus 220Ah 12V Tubular Battery Highlights: Batteries designed for deep cycle inverter application. Excellent charge acceptance; Long life-high pressure casting machine used for ...

High backup tubular battery. A high backup tubular battery is rechargeable and is widely in use for various applications, including backup power for homes, offices, and industries. The tubular design of the battery features specific engineering ...

Our tubular inverter batteries come in different capacities ranging from 130AH to 240AH. These inverter batteries not only last long but are incredibly powerful too. Starplus 12v 220ah tubular batteries are specially designed to be used with home and industrial inverters where traditionally flooded tubular batteries are typically used.

Starplus 12v 220ah tubular batteries are specially designed to be used with home and industrial inverters where traditionally flooded tubular batteries are typically used. Most inverters have chargers with high-ripple content that cause the ...
