This 12th edition of the "Snapshot of Global PV Markets" aims at providing preliminary information on how the PV market developed in 2023. The 29th edition of the PVPS complete "Trends in Photovoltaic Applications" report will be published in Q4 2024.

Who will dominate the global PV module market in 2023?

A total of 18 Chinese companies were selected in the top 20 list, with a total output of more than 440GW in 2023, gradually taking over the global PV module market with their unique advantages. LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year.

What will IEA PVPS look like in the future?

In the coming years, IEA PVPS will follow the dynamic evolution of decommissioning, repowering and recycling closely, with the expected impact on the installed capacity, market projections for repowering and the decline in PV performances due to aging PV systems. Data Model and Data Acquisition for 2.4 AC or DC Numbers?

What does the Net Zero Energy Act mean for the PV industry?

In 2024, the announcement of the final Net Zero Energy Act in the EU has increased the hopes of seeing a local industry developing: the NZIA is written to offer options for European countries to dedicate parts of the PV market to local manufacturers through specific pre-conditions in tenders, public procurement and additional measures.

Why is PV oversupply a problem in 2023?

Oversupply of PV modules in 2023 has shed a light on the difficulties to align production and demand in a very versatile environment: while production capacities increased significantly in China, the global demand was framed by constraints in markets such as the USA, India, Korea, and Australia, not exclusively.

How much does PV contribute to electricity consumption?

The increasingly large volumes of installed capacity are making a tangible contribution to electricity consumption around the world. The two principal PV markets, China and the Europe Union, demonstrate this with approximately 10% each. In total, PV contribution amounts to over 8% of the electricity demand in the world.
