

# Sunken solar Eswatini

Can solar power help Eswatini achieve its electrification goals?

Although Eswatini's electrification rates are relatively high, they are still a long way off 100% (the country's target for 2022). Solar power is the most viable solution for Eswatini to help meet its electrification goals and save costs down the line.

Who is segensolar & what is it doing in Eswatini?

SegenSolar is a leading African independent power producer that is overseeing a ground-mounted project in Eswatini. They are keen to foster the development of additional small and large-scale PV installations across Eswatini. Homeowners can get in touch for more details about their work.

Why is Eswatini's PV market growing?

The biggest driver of growth in Eswatini's PV market comes from private PV projects. In hopes of reaching ambitious goals, Eswatini has made solar panels and batteries exempt from import duties to help with this.

Does Eswatini have electricity?

Despite being one of Africa's smallest countries, Eswatini has an impressive, diverse topography and climate. Unfortunately, its electricity infrastructure is not reliable.

What is driving Eswatini's growth?

The biggest driver of growth in Eswatini's PV market is private PV projects. In 2022, Eswatini partnered with Frazium Energy to commission a new 100MW solar storage project with 75,000 PV panels, hoping to produce more than 100 million kWh of electricity a year and generate at least 200 jobs.

Plus, although Eswatini's electrification rates are relatively high, they are still a long way off 100% (the country's target for 2022). So, Eswatini looks towards renewable energy to help meet its electrification goals and save costs down the line -- and solar is the most viable solution.

The Eswatini Electricity Company (EEC) is engaged in the business of generation, transmission and distribution of electricity in the Kingdom of eSwatini. ... Lavumisa 10MW Solar PV Plant. The power plant, which tracks the sun from morning to sunset, generates a capacity of 13.75MW and contributes a guaranteed capacity of 10MW to EEC's power grid.

A stand-alone mini-grid with a centralised 35kW solar PV plant with a 200kWh lithium-phosphate BESS, smart meter system, and an LV reticulation network designed with aerial bundled conductors. This smart 35kW mini-grid solar project, estimated at R3.5 million, was commissioned and operational on 1 January 2021.

In the serene yet underserved part of the Manzini region in Eswatini, stands a beacon of hope and innovation -
