

Researchers from the Vrije Universiteit Brussel and KU Leuven, in collaboration with the N.V. Energiebedrijven Suriname (NVEBS), have now mapped out how Suriname could use its newly acquired dam to support a climate-friendly energy transition based on wind energy.

Suriname, a nation blessed with abundant natural resources, possesses immense potential for renewable energy sources. However, the recent electricity supply shortages caused by low ...

In remote areas of Suriname, where access to electricity is still a challenge, collaborative projects are being launched to make solar energy and other renewable sources accessible. Through ...

Suriname is poised to join the world stage as a global energy supplier after French supermajor TotalEnergies and US independent APA green-lighted the country's first major oil and gas development last week. The \$10.5 billion deepwater GranMorgu project puts the small South American nation on the map as a future producer and likely exporter of ...

Rowan Energy is a great way of earning extra money and shortening the payback time on your solar panels. The installation cost of the Rowan Miner has paid for itself already. The money we're now earning is helping to offset energy cost increases. We're so glad we installed solar and linked up with Rowan Energy!

In 2023, Ben joined Rowan Energy as the Vice President of Sales and Marketing, where he continues driving the growth and success of RKO's, Raptors, and chemical sales. Brandon Dore . Brandon Dore is a 2006 graduate of the University of Louisiana with a BS in Industrial Technology. His oil and gas career began at Baker Hughes, where he held ...

Mr. Rowan is an Environmental Scientist with over 30 year's experience in advising corporations, financial institutions, public bodies and NGOs on Environmental, Social and Governance matters across a broad range of sectors but especially ports & logistics, energy, oil & gas, infrastructure and heavy industries.

Daniël A. Lachman. Daniël A. Lachman has gained experience in several upper/top management positions in the food, industrial and medical gases, metals and mining, education, and business & country consulting industry in various countries, and has managed workforces up to a couple hundred people and assets close to 1 billion USD in value, and chaired various strategic ...

In remote areas of Suriname, where access to electricity is still a challenge, collaborative projects are being launched to make solar energy and other renewable sources accessible. Through solid collaboration among all involved parties, sustainable energy solutions are being implemented where needed, not only meeting basic needs but also ...

The Suriname Energy Chamber officially launched the Suriname Energy Guide Edition 2024/2025 on July 31, 2024, at the Marriott. The event highlighted the guide's significance for the energy sector, followed by addresses from distinguished guests. A networking reception concluded the ...

As of 2020, 52.9% of Suriname's electricity was generated from fossil fuels, 46.7% from hydro power, and 0.4% from solar energy. Suriname aims to keep its share of electricity from renewable sources above 35% by 2030, according to the country's updated NDC (Nationally Determined Contribution) plan.

Suriname, a nation blessed with abundant natural resources, possesses immense potential for renewable energy sources. However, the recent electricity supply shortages caused by low water levels in the Afobaka Hydropower Dam, underscore the need to diversify the energy mix and lessen dependence on a single source.

This document presents Suriname's Energy Report Card (ERC) for 2020. The ERC provides an overview of the energy sector performance in Suriname. The ERC also includes energy efficiency, technical assistance, workforce, training, and capacity building information, subject to the availability of data.

Suriname: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Introduction. Suriname, also known as Republic of Suriname, is a country located on the north-eastern Atlantic coast of South America.. The country's total area is below 165,000 Km², which makes it the smallest country in South America. 80% of the country's area is covered with tropical rain forests, with only 1.5 million ha are considered suitable for agriculture.

This paper discusses the potential of hydro-supported wind power integration in Suriname, exploring hourly-to-multiannual resource complementarities and pathways towards high wind power penetration to displace thermal (diesel and heavy fuel oil) sources from the electricity mix of Suriname's isolated EPAR grid.
