Should you buy a 3KW Solar System?

When purchasing a 3kW solar system, explore available tax credits and subsidies to reduce your installation costs. A 3kW solar system can yield sufficient energy to fulfill the energy requirements of a small home or business. So are you planning to go green with it but don't know how much you need to spend?

How long does a 3KW Solar System take to pay for itself?

Based on our estimated savings of \$700 per year, a 3kW solar panel system that costs you \$9,000 upfront would take roughly 12.8 years to pay for itself. However, if you were to apply the federal tax credit of 30% and lower your upfront costs to \$6,300, the same solar array could pay for itself in about nine years.

How much electricity does a 3 kilowatt solar system produce?

Taking an average from our examples in Minnesota and New Mexico above, let's say your 3-kilowatt solar energy system produces 14 kWh of power per day. Over 30 days, your system would produce about 420 kWh of electricity per month. That's 420 kWh you don't have to pay your utility company for.
