The SVEVIND Energy Group is a privately owned group of companies based in Dresden, Germany. Founded and established by entrepreneur Wolfgang Kropp is specialized on planning and developing large-scale renewable energy projects.

SVEVIND Energy Group announced on 26th October 2023 that it has completed a transaction with the leading Norwegian utility Statkraft. Our Swedish subsidiary SVEVIND Nordic AB, the successor to SVEVIND AB, is now officially part of Statkraft.

The previous owners and project developers behind the wind farm cluster, Svevind AB and Enercon, are pleased to see the future-proof implementation of the Markbygden energy grid into the Swedish electricity network.

Svevind Group????Hyrasia One??????200????????????????????255,000??????????,??40GW????????(?? ...

The contract was awarded by Hyrasia one -- a subsidiary of the European cleantech group SVEVIND Energy Group --which is developing a major wind-solar-hydrogen plant in Kazakhstan. The plant will produce up to two million tonnes of green hydrogen or 11 million tonnes of green ammonia per year from 2030.

What SVEVIND Energy developed since 2002 became Europe's largest and most powerful onshore wind farm. A further 1,400 megawatts are to be installed by 2026, making Sweden's energy supply much more sustainable.
