

Will Vietnam face an electricity shortage?

Strategic Plan for Transition to Renewable Energy Sources Vietnam's Energy Ministry predicts that the country is likely to face an electricity shortage as the development of new power plants lags behind the country's rapidly growing energy consumption. The government allowed Vietnamese companies to have 100% foreign ownership in the energy sector.

Does Vietnam have solar power?

Vietnam has seen rapid growth in solar energy development in recent years and became one of the leaders in the Southeast Asian solar power market by 2023. Vietnam's installed solar power capacity reached around 19 GW in 2022.

Will Vietnam increase the installed capacity of solar PV systems?

The Ministry of Industry and Trade (MOIT) has an additional plan to increase the installed capacity of solar PV systems. In May 2023, the Vietnamese government launched a 135 USD million energy strategy aimed at outfitting half of the country's residential rooftops with photovoltaic (PV) systems using a real metering system.

Will Vietnam build a better energy future?

Building a cheaper, cleaner, and more secure energy future for Vietnam will not happen overnight. Other markets further along in development of renewable power greatly benefited from the support of the government.

How good is Vietnam's energy system?

According to the World Energy System Index for the period 2018-2022, Vietnam held the following positions: 83rd place (2018), 91st place (2019), 65th place (2020), 61st place (2021), and 55th place (2022). Despite fluctuations, the overall trend is positive, indicating significant improvement in Vietnam's energy system performance over five years.

Which segment has the largest solar market share in Vietnam?

The solar photovoltaic segment is likely to have the largest market share due to the declining cost of solar modules and the versatility of these systems to produce electricity and heat. According to the IRENA renewable energy statistics for 2023, the installed capacity of solar PV systems in Vietnam reached 15,815 MW in 2023.

We are committed to contributing to Vietnam's socio-economic development and supporting the country's net-zero emissions targets through our capabilities in sustainable urban development and renewable energy. In parallel with Vietnam's Power Development Plan 8 to enhance energy security and sustainable growth by prioritising renewable ...

Vietnam 4 kboepd (2023 production) Our Chim Sáo fields in Vietnam averaged 4 kboepd in 2023 (2022: 4 kboepd), with additions from new wells online offsetting natural decline. In June 2024, we took the decision to terminate the previously announced sale of our Vietnam business.
