

Sweden energy products llc

What energy sources does Sweden use?

The supply of energy to the Swedish energy system is based on renewable energy sources such as water, wind, sun, and biomass. We also import energy products such as nuclear fuel, biofuels, fossil fuels and natural gas.

What type of electricity is produced in Sweden?

Renewables and nuclear are given as the electricity produced. Energy in Sweden is characterized by relatively high per capita production and consumption, and a reliance on imports for fossil fuel supplies. With 98% of electricity generation coming from renewables and nuclear in 2023, the electric grid is nearing zero emissions.

How do I contact swedenergy?

If you are looking for more extensive information about us, or the Swedish energy sector in general, you are most welcome to contact us by sending an email to info@energiforetagen.se. Swedenergy is a non-profit industry and special interest organisation for companies that supply, distribute, sell, and store energy.

What is Sweden's energy plan?

Sweden's energy plan is to have 65% of energy produced by renewables by 2030 and 100% by 2040. Renewable energy includes wind, solar, biomass and geothermal energy sources.

What does the Swedish Energy Agency do?

The Swedish Energy Agency participates in the international negotiations and in the Swedish business delegation. Electrification of the transport sector is progressing across the Nordic countries. Join us live on November 14 on a digital conference on charging infrastructure in a Nordic context.

How is nuclear fuel supplied to the Swedish energy system?

The supply of nuclear fuel to the energy system has varied over time. From the 1970s until today, we have built up, produced electricity, and decommissioned nuclear power. Crude oil and petroleum products are supplied to the Swedish energy system, among other things, to supply Sweden with fuel.
