

Sweden ultimate power solution

What are the solutions for Sweden's power system?

The study proposes four main solutions for the Swedish power system: Solution IV: End-use decarbonisation via renewable-based electrification. The analysis assesses of the likely impact of these solutions, advises on how to implement them, and highlights pilot projects that could be replicated in Sweden or elsewhere.

Does Sweden need a 100% renewable power system?

Sweden has set out to meet 100% of its electricity needs from renewable sources by 2040. With a highly decarbonised power system already in place, the country is well positioned to help the world meet crucial climate goals. In the meantime, Sweden itself needs innovative solutions to meet its ambitious 100% renewables policy goal.

Can systemic innovations help Sweden achieve 100% renewable electricity by 2040?

This study has two main aims. First, it considers how systemic innovations to integrate high shares of renewables (including from variable renewable energy, VRE) into the power system could help to meet Sweden's ambitious policy target of 100% renewable electricity by 2040.

Can Sweden achieve 100% renewable power by 2040?

IRENA (2020), Innovative solutions for 100% renewable power in Sweden, International Renewable Energy Agency, Abu Dhabi. Sweden has set out to meet 100% of its electricity needs from renewable sources by 2040. With a highly decarbonised power system already in place, the country is well positioned to help the world meet crucial climate goals.

How can the Swedish Energy Agency contribute to power system upgrades?

The Swedish Energy Agency can contribute to the success of power system upgrades by continuing to fund projects aimed at helping municipalities to mobilise local companies in the construction and maintenance of new wind power or network expansion projects (with services including hotels, catering, electricians, etc.).

Will Sweden's transition to 100% renewable power empower citizens?

This could ultimately empower citizens, making them an integral part of Sweden's transition to 100% renewable power, especially in light of recent trends that are changing the passive power consumer into an active and engaged prosumer.
