

Why is Switzerland becoming a city of the future?

Energy, mobility, architecture and business: thanks to technological innovations, the city of the future will be less polluted and more pleasant. In Switzerland, as in other parts of the world, the urban ecosystem is reinventing itself to improve the quality of life in the cities. The world is becoming 'smart'.

Is Switzerland a smart city?

Switzerland's economic capital is taking the smart city approach even further: construction of a new district in the south of Zurich - dubbed 'Green City' - is close to completion, with the first residents expected to move in by July 2017.

Why is Switzerland a model for foreign cities?

Switzerland's ability to rise to all these challenges has made it a model for foreign cities. Moving the smart city concept forward requires a diversity of projects and stakeholders - stakeholders Switzerland has a unique ability to bring to the table.

Is Switzerland a 'smart city'?

In Switzerland, as in other parts of the world, the urban ecosystem is reinventing itself to improve the quality of life in the cities. The world is becoming 'smart'. From Malmö; to Lyon, from Amsterdam to Lausanne, a new 'smart cities' concept is emerging thanks to data collected by connected devices.
