

Why is Syria reliant on Iran?

Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector. **Syria has not exported oil since late 2011, when international sanctions came into force, and has become dependent on fuel imports from Iran to keep power supplies running.

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

How much oil does Syria produce a day?

**Prior to sanctions, Syria produced some 383,000 barrels per day (bpd) of oil and liquids, according to previous analysis by the U.S. Energy Information Administration (EIA). **Oil and liquid production fell to 40,000 bpd in 2023, according to separate estimates from the Energy Institute.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

How did US and EU sanctions affect Syria's electricity sector?

US and EU sanctions strained Syria's ability to import fuel and spare parts, and barred foreign entities (including European and Arab ones) from extending loans or implementing infrastructure projects in Syria's electricity sector.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

The Syrian Minister of Electricity unveiled an ambitious plan to introduce up to 2,500 megawatts of solar energy and 1,500 megawatts of wind power by 2030, alongside the installation of 1.2 million solar water heaters. However, Syria's complex economic conditions present a major obstacle to achieving these targets.
