Are Syrian rebels advancing south to Homs?

Syrian rebels have made a lightning advance in the north of the country,taking two major cities: Aleppo,the second biggest city,and Hama,a strategically important city that lies on a vital supply route. The rebels are saying they'll advance further south to Homs,just over 100 miles from the Syrian capital of Damascus.

Will Syrian rebels make an advance to Aleppo after Israel weakened Hezbollah?

Hadi al-Bahra,a Syrian opposition leader representing anti-Assad groups,including the Turkey-backed Syrian National Army (SNA),said rebels felt encouraged to make an advance for Aleppolast week after Israel debilitated Hezbollah and weakened Iran's footprint in the region.

Did HTS mimic the Syrian Army's structure?

Until then,HTS had to some extent mimicked the Syrian army's structure,much as it also reproduced civil institutions such as courts in Idlib,said Daren Khalifa,an HTS expert at the Crisis Group think-tank. Then,she said,the group realised that approach relied on resources and large groups of recruits which HTS did not have.

Is Syria a'regime is winning' or 'opposition is losing'?

Until recently, the Syria situation was seen in Turkey as "regime is winning, opposition is losing" with the Iran-Russia axis defining the developments on the ground, said Galip Dalay, a senior consulting fellow at Chatham House, a think tank in London. But the recent rebel push has changed that power dynamic.

Will Syria's fall of Aleppo disrupt Iran's proxies?

In Syria,Israel has consistently targeted Iranian personnel and supply routes used to transfer weapons to its proxies. The fall of Aleppo and potentially other cities bordering Lebanon could further disrupt those routes,placing Iran in a difficult position.

SmartHelio is a clean-tech start-up based out of Lausanne Switzerland. We optimize the return on investment for both solar roof-top and mini/micro-grid companies, and their clients using our IoT sensor technology and AI-based data analytics.

SmartHelio provides a software that helps solar utilities automatically predict and prevent downtime disruptions. We help solar utilities to generate extra \$200k per plant income on \$10k spent using our software, by preventing 700 faults per year.
