

Why is electricity important in Tajikistan?

Electricity is an integral part of Tajikistan's economy, and providing a clean, affordable and secure supply of electricity has been of paramount importance for the government since independence. Despite its energy potential, Tajikistan's energy sector is susceptible to supply shocks.

Why is Tajikistan transforming its energy system?

This report backs the transformation of Tajikistan's energy system, which is capable of achieving energy sector development goals that will provide affordable, secure and clean energy for its population and neighbouring markets, while contributing to the region's energy transition and climate change goals. 1.

What is the energy system in Tajikistan?

Tajikistan's energy system depends primarily on hydroelectricity, coal and oil. Hydropower and coal are produced domestically whereas virtually all oil and gas must be imported to meet the demand. This also explains the high share of electricity in final consumption, as well as the increasing use of coal in both transformation and industries.

Is Tajikistan part of EU4Energy?

Tajikistan is one of the focus countries of the EU4Energy programme, which is being implemented by the IEA and the European Union along with the Energy Community Secretariat and the Energy Charter Secretariat.

Who is Centrica Energy?

Centrica Energy is our global energy trading and logistics arm. We trade power, gas, LNG, and energy attributes and connect producers, suppliers and offtakers in the wholesale energy markets - and we provide our clients with the best route-to-market services available to the market today with physical and financial settlement approaches.

Does Tajikistan have a hydro power plant?

With abundant water potential from its rivers, natural lakes and glaciers, Tajikistan is almost exclusively reliant on hydro for electricity generation. It is home to some of the world's largest hydropower plants and is ranked eighth in the world for hydropower potential with an estimated 527 terawatt-hours (TWh).
