

Largo Resources, a vertically-integrated vanadium supplier launching its own line of redox flow batteries for energy storage, is establishing 1.4GWh of annual battery stack manufacturing capacity. The company said yesterday that it has secured a location in Massachusetts, US, from which it will manufacture the vanadium redox flow battery (VRFB ...

Largo Vionx , Vionx ? 2002 Largo .

Largo Clean Energy has acquired superior VRFB technology that was previously owned by VionX Energy, a company that had been involved in the renewable energy storage market since 2002.

VionX Energy is an energy company manufacturing power and energy storage products to deliver long run-time and cost-competitive operation. The company's system delivers unrivaled Levelized Cost of Storage at discharge durations greater than 4 hours due to low capital and operating cost and a product life of over 20 years with no performance

VionX Energy offers energy storage solution for the grid, though Vanadium Redox Flow (VRF), that optimizes flow battery technology to deliver long run-time and cost-competitive. This technology brings together an 6-10 hour runtime with optimized storage capacity and long-term power output that's highly competitive.
