

Tc energy company Guam

The MD& A can be found on SEDAR+ at under TC Energy's profile. This presentation contains statistical data, market research and industry forecasts that were obtained from third party sources, industry publications, and publicly available information.

For more than 70 years, TC Energy has proudly operated pipelines, storage facilities and power-generation plants that support life in Canada, the U.S. and Mexico. Our facilities operate safely, reliably and quietly. Explore our core operations below.

Our Energy Solutions aim to leverage the size and scale of our energy network and trading platform to be the most trusted and reliable source of low carbon energy for the North American industrial and natural gas sectors.

TC Énergie est l'une des principales sociétés d'infrastructures énergétiques en Amérique du Nord et exerce ses activités dans les secteurs du gaz naturel, du pétrole et de l'énergie.

Overview Operations History Ownership Political activities Leadership TC Energy's natural gas pipelines business builds, owns and operates a network of natural gas pipelines across North America that connects gas production to interconnects and end use markets. The company transports over 25% of continental daily natural gas demand through 91,900 km (57,100 mi) of pipelines. In addition, the company owns 535 Bcf of natural gas storage facilities...
