What is Tesla Solar Roof?

Tesla Solar Roof is designed to maximize your roof's energy production without compromising the aesthetics of your home. Solar Roof is constructed with a combination of glass solar tiles and architectural-grade steel tiles. Each tile is virtually indistinguishable in color and trim.

Where is Tesla's new solar roof made?

The brand new solar roof will be entirely manufactured in the United States. Tesla plans to manufacture all of their solar tiles at their Buffalo facilities using solar cells provided by their partner, Panasonic. Peter Rive, the CTO at SolarCity had previously claimed the efficiency of one of their solar tiles was equivalent to a standard panel.

Can Tesla add solar to your roof?

Since Solar Roof has a smaller footprint than traditional solar panels, Tesla may be able to add more solar to your roof- working around vents, skylights or other obstructions. This helps maximize the amount of solar energy your roof can produce. Control your system with 24/7 mobile monitoring from anywhere in the world.

Does a Tesla Solar Roof pay for itself?

Tesla Solar Roof helps pay for itself over time. As a fully integrated system, Solar Roof can maximize your solar generation and help you take control of your monthly electricity bill. Solar Roof brings your roof to life with beautiful tiles that can power your home with clean energy for decades.

Does Tesla Solar Roof have a warranty?

Once the system is installed, you can download the Tesla mobile app to monitor your system in real-time, anywhere. Solar Roof has a 25-year tile warranty. See your limited warranty for complete details, including limitations and requirements. Tesla Solar Roof is designed to integrate seamlessly into the aesthetic style of your home.
