Can the Gambia transform the energy sector?

An unprecedented level of support from the international community provides The Gambia with the opportunity to transform the energy sector and emerge as one of the leading energy sectors in the sub-region and the African continent. In this context, the Electricity Roadmap has undergone its third update since 2015.

Why is access to electricity important in the Gambia?

Providing access to electricity to support inclusive and sustainable socio-economic development is one of the pivotal cornerstones of the Gambia government's priorities as articulated in the national energy sector policies and strategies, and highlighted in the National Development Plan (2018-2021).

What is the electricity system in the Gambia?

The existing electricity network in The Gambia consists of a number of separate 33 kV and 30 kV systems fed from local power plants throughout the country. On-going projects are developing the transmission grid to interconnect these systems and establish interconnections with neighbouring systems.

How much power does the Gambia have?

As described in the previous section, transmission linkages will create a unified national network by 2022-23. As of mid 2021, the total net installed capacity in The Gambia is 154.5 MW of reciprocating engines, but only 97.0 MW are currently available for power generation.

Did Gambia import energy?

Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.

How has NAWEC changed in the Gambia?

Since The Gambia entered a new political chapter in 2017, electricity supply has been stabilized and villages in the North Bank have been connected. NAWEC has made significant strides to improve operational efficiency and financial performance, and is in the middle of a major organizational restructuring.

The 2021 update of the strategic electricity roadmap exemplifies the Gambia government's drive and commitment to modernizing the electricity sub-sector by building on the gains achieved over so many decades, but also to capitalize on the opportunity for low-cost imports available in the emerging West Africa Power Pool (WAPP) regional ...

Eliiy Power General Information Description. Manufacturer of large-sized lithium-ion batteries and power storage systems designed to create the electricity storage market for indoor and outdoor use.

An expression of eternal beauty, the golden ratio represents the fact that ELIIY Power is a future-oriented next-generation energy company focused on finding the right balance for our planet and its people. The design of all our employees' business cards and our "POWER YIILE PLUS" electricity storage system also employs the golden ratio.

The Gambia's energy sector is in the middle of a major transition. Since The Gambia entered a new political chapter in 2017, electricity supply has been stabilized and villages in the North Bank have been connected. NAWEC has made significant strides to improve operational efficiency and

ELIIY Power Co., Ltd. announced that it expects to receive \$25 million in funding from Suzuki Motor Corporation Nov. 08 November 13, 2023 Share ELIIY Power Co., Ltd. Technologies announced that it will receive \$25 million in a round of funding on November 14, 2023. The transaction included participation from returning investor Suzuki Motor ...

Eliiy Power's storage systems are also bolstered by the adoption of communication functions and IoT technologies, which monitor operating status and various other factors such as battery voltage and temperature, contributing to enhance the reliability and stabilize operations of the storage systems.

ELIIY Power ranks 3rd among 7 active competitors. 1 of its competitors is funded while 1 has exited. Overall, ELIIY Power and its competitors have raised over \$91.1M in funding across 5 funding rounds involving 32 investors. There is 1 public company in the entire competition set.

Gambia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Onshore wind: Potential wind power density (W/m<sup>2</sup>) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global distribution of wind resources. Areas in the third class or above are considered to be a good wind resource.

The Gambia's power sector is in a precarious situation. Only 45MW of generation capacity is available in the Greater Banjul Area (GBA) compared to at least 70 MW demand, meaning blackouts are pervasive.

# The Gambia eliiy power

The current installed power capacity of 102 MW falls short of peak demand by 11 MW. The Gambia's Electricity Sector Roadmap (2019-2025) aims to scale up electricity generation to 200 MW of available capacity at peak in 2025, with 14MW expected from the OMVG project with Guinea and Senegal, and 50MW from the Souapiti project and the remainder ...

Example of application at ELIIY Power. Public / Industrial Use. High-capacity electricity storage system Electricity storage capacity: 270kWh. End-of-life products. More. ELIIY ONE. Limited. Portable Electricity Storage System Electricity storage capacity: 155Wh. More. ...

The 2017 Gambia Electricity Sector Roadmap provides a framework for the short, medium, and long-term measures to import low-cost power through regional interconnection under the Least Cost Power Development Plan (LCPDP), minimize blackouts, and reform the market structure to accommodate IPPs.

29 January: Launches POWER iE5 Link electricity storage hybrid system. June: Lithium-ion starter battery HY110 for motorcycle is equipped with Honda 2018 model CRF1000L Africa Twin as standard. 15 March: ...

Senelec was to connect Gambia's electric grid through Keur Ayib, Karang and Tamba Kunda. In March 2022, the national energy company signed another agreement with Senelec to increase this capacity to 50 megawatts.

The electricity storage systems offered by ELIIY Power are renowned for their high levels of safety and reliability, and are the go-to choice for home use, as well as various industries including security, communications, hospitals, welfare facilities, government offices and mobile applications. We believe this is in recognition of the safety ...

At ELIIY Power's plants, all processes have been fully automated, with batteries being produced in a clean environment. When constructing the plant, we envisaged a pharmaceutical factory. Eliminating manual intervention prevents contamination with foreign matter and has created an extremely clean environment. Even a small amount of foreign ...

Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions - during

which up to half of their energy content is lost. Renewable power sources generate electricity directly from natural forces such as the sun, wind, or the movement of water.

The Gambia intends to achieve these targets with a combination of grid extension and mini grids and isolated systems and, crucially, it set a high target of renewable electricity to be achieved by 2030 of 48% (that includes hydro power shared with Senegal and Guinea from the OVSG).
