1.4 The development of solar energy in The Gambia By virtue of its geographical location, The Gambia enjoys very good solar insolation throughout the year with slight seasonal variations. The average daily solar radiation ranges from 4.46.7 - kWh/m<sup>2</sup> making solar energy the most prominent renewable energy resource of the country.

Through the EIB project (<https://bit.ly/3ltGXOv>), The Gambia is set to become the first country in the world to ensure that as many as 1,100 rural schools and health centers will benefit from having a reliable energy supply by using solar and battery pack technology.

The minimum daily solar production capacity of The Gambia is 4kWh solar power radiation per square meter. The National Development Plan (NDP) seeks to increase the share of renewable energy from 2 to 40 percent.

5. Wind: Wind energy is the only renewable source that has previously fed into the national grid, but this was short-lived due to ...

The relevant capacity in this case is energy generation capacity as measured in megawatts (MW). The Gambia's electricity generation capacity is significantly less than 100MW. The Turkish company (Karpowership) that is selling electricity to the country from an anchored ship is providing 30MW.

The President of the Republic of The Gambia Adama Barrow was in Jambur on 4 February 2023 for the ground-breaking ceremony of a 23 MW solar power plant, the largest solar park in the country, which will be used to reinforce the grid of the state-owned Gambia National Water and Electric Company (NAWEC).
