

The land under the photovoltaic panels can be rented out for breeding

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

How are lease rates determined for solar land?

Lease rates for solar land are determined through negotiations between the landowner and the solar company. Several factors can influence the lease rate, including the size and quality of the land, solar resource potential, local market conditions, and the cost to develop and build the solar project.

Can landowners install permanent structures on the land before a solar project?

Generally, before the solar project is installed, we ask that landowners do not install permanent structures on the land, but any farming activities can continue as before. During construction of the solar project, farming or any other use of the land will have to stop.

Should a landowner lease a portion of their land for solar?

The length of the lease is on one side a long-term financial gain but may also be a point of hesitation for landowners when choosing to lease a portion of their land for solar. The lease requires the landowner to dedicate a portion of their land to solar for a set period, typically 20-25 years.

What happens during a solar panel lease term?

During the lease term, landowners will be unable to use the land (or any adjoining land) for other opportunities that would obstruct or affect the operability and efficiency of the solar project. For obvious reasons, solar panel leases will grant the tenant a right of free, uninterrupted and unobstructed passage of light to the solar panels.

Can you lease a solar farm?

Using a portion of your land to lease for a solar farm opens up a diversified and dependable income stream. Responsibly designed solar can be a partner that supports the success of the UK's rural communities for generations to come.
