What is Timor-Leste's energy policy?

The government of "Timor-Leste" is also trying to shift its policy to the introduction of clean energy, such as hydraulic, wind, and solar power generation. However, the most of its national budget for the electric power sector are spent on fuel import and electricity charges, so it is difficult to realize its policy.

What is the main power source in Timor-Leste?

Almost all main power sources in "Timor-Leste" depend on diesel electric power generation, and the fuel used for power generation (crude oil) is all imported.

Does Timor-Leste have electricity?

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Will CNNP move into the solar market of Timor-Leste?

3M(TM) Glass Bubbles S22 are hollow glass spheres with a typical density of 0.22 g/cc and an isostatic crush strength of 400 psi. These glass bubbles can be used in a variety of applications including oil and gas drilling and tooling board. The bubbles produce strong, stable voids and low thermal conductivity, helping the coating achieve the necessary compressive strength.
