

Titan new energy Chile

How does Chile benefit from solar energy?

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

Does Chile have a green energy source?

As of June, roughly half of Chile's installed power generation capacity for 2021 was sourced with renewable energy resources, making the production of green hydrogen easier -- as opposed to its dirtier cousins produced with fossil fuels.

Will Chile achieve net-zero emissions by 2050?

Last December, Chile's centre-right government published the country's first energy transition strategy, which provided targets for achieving net-zero emissions by 2050, including accelerating solar, wind and geothermal energy across the country.

How has Chile accelerated its energy transition?

Despite its historic ties to fossil fuels and copper mining, Chile in recent years has accelerated its energy transition through broad-based political support, private-public partnerships and innovative green technologies.

When will Chile start producing green hydrogen?

The project is expected to start in 2025, with first production of green hydrogen in 2027. The project is in line with Chile's target of 25 GW of green hydrogen production in the energy mix by 2030.

Is there an alternative to solar energy in Chile?

Chile has begun to explore an alternative. Both Cerro Dominador and the Alba Project are powered by so-called solar salts, extracted from the Atacama Desert, composed of potassium nitrate and sodium nitrate. When melted and kept in a liquid state, they allow energy to be stored.

SANTIAGO, December 2, 2021 - Total Eren has begun studies to develop a 10-GW wind installation in southern Chile for large-scale green hydrogen production, TotalEnergie's renewables arm announced on Thursday.

CenterPoint Energy (NYSE: CNP) has announced a quarterly dividend increase, declaring a regular cash dividend of \$0.2200 per share on Common Stock. This represents a \$0.010 increase from the previous quarter's dividend. The dividend will be payable on March 13, 2025, to shareholders of record as of February 20, 2025. The dividend growth rate aligns with ...
