

Togo aeromine technologies

What is aeromine technology?

Aeromine Technologies' innovative,scalable,motionless systemeasily installs on the edge of a building generating up to 50 percent more energy at the same cost as rooftop solar PV. Q&A with David Asarnow,CEO |Aeromine What is Aeromine?

Is aeromine a good wind turbine solution?

Aeromine is a highly innovative solution and not really comparable to existing wind turbines. Historically,rooftop and small wind systems either don't generate meaningful power or are not scalable due to environmental and visual/sound impact concerns,making them untenable.

How can aeromine help with decarbonization?

Aeromine combines local GIS data,expert knowledge on building performances,and proprietary tools to analyze regional wind resources. With this expertise,we can support your decarbonization journey through a systematic implementation across your portfolio. Copyright © Aeromine Technologies,2020-2024.

How much energy does a 100kW aeromine system produce?

A 100kW Aeromine system in a windy region will produce at least 268,000 kWh. Aeromine is designed to integrate seamlessly with solar,and the combination of both can provide 100% of a building's onsite energy needs,mitigating the needs for expensive storage solutions.

A 10 units Aeromine system installed on a 15m (49ft) tall building in an area with 6,0 m/s average yearly wind speeds will generate around 100.000 kWh/year. Portfolio Assessment Process The Aeromine team will review your portfolio of ...

Aeromine Technologies General Information Description. Developer of wind energy systems technology designed for large buildings. The company wind energy systems that do not move, are safe, work silently, and can be installed along the rim of the building facing the prevailing wind direction, enabling large building owners to utilize untapped wind energy for onsite power ...

11 / 15 / 2022 Facilities Management News: Aeromine Technologies. Facilities Management News: Designed to work seamlessly with a building's existing electrical system, the combination of Aeromine's wind solution with rooftop solar can generate up to 100 percent of a building's onsite energy needs while minimizing the need for energy storage.

City: Los Angeles Year founded: 2020 Total funding: \$3.2 million What it does: Aeromine produces rooftop devices for capturing wind energy. Why it's hot: Many companies are looking for ways to generate on-site renewable electricity to reduce their carbon footprints and find relief from high energy costs. Aeromine said its systems, which mount to the edge of flat-roof ...
