

Trina Photovoltaic Panel 665

What is Trina Solar?

Based on the aim of improving the system efficiency and reducing the balance-of-system costs, Trina Solar's research and development team has introduced an innovative design of low-voltage and higher module string power output. Typically, Trina can interconnect 28 Vertex modules into a string.

What is the irradiance of Trina Solar?

NOCT: Irradiance at 800W/m, Ambient Temperature 20°C, Wind Speed 1m/s. *Please refer to regional datasheet for specified connector. CAUTION: READ SAFETY AND INSTALLATION INSTRUCTIONS BEFORE USING THE PRODUCT. 2021 Trina Solar Co., Ltd, All rights reserved, Specifications included in this datasheet are subject to change without notice.

How many vertex modules can Trina interconnect into a string?

Typically, Trina can interconnect 28 Vertex modules into a string. Compared with other reference module, a single module string can achieve up to a 34% power increase, 0.012-0.014 BOS reduction, 1.2%-1.5% LCOE reduction, indicating an innovative technological breakthrough and ushering in a new era of 600W+. High Reliability

What makes Trina Solar vertex modules unique?

Based on Trina Solar's leading multi-busbar technology, the Vertex modules adopt the 210mm silicon wafer, non-destructive cutting and high-density interconnect technologies, which together allow it to reach 670W power output and 21.6% module efficiency.

670W Ultra-high Power with 21.6% High Efficiency. Based on the 210mm large-size silicon wafer and monocrystalline PERC cell, the Vertex comes with several innovative design features allowing high power output of up to 670W. Excellent ...

Trina Solar today announced that its Vertex 660W+ solar power modules have received IEC 61215 and IEC 61730 certification for their performance and safety from TÜV Rheinland. This series generates power of ...

Trina 665W Monocrystalline Tier 1 - Photovoltaic Technology Cable 4.0mm*2 (0.006 inches*2), Portrait: 350/280 mm(13.78/11.02 inches) Length can be ...
