

From solar rooftops and the Off-grid sola-powered Capacitive Deionisation (CDI) systems to the pioneering floating solar PV with 100kW. innovative solutions like floating solar panels (a first for the PICs) and raised solar installations are being embraced in Tuvalu as the Pacific grapples with addressing the challenge of limited land space.

In Funafuti, a small pond bordered by pig pens is now home to an innovative renewable energy pilot program, floating solar panels. Tuvalu Energy Corporation General Manager, Mafalu Lotolua says the project is a response to the ...

The new solar farm, spanning several hectares and equipped with advanced photovoltaic technology, is designed to meet a significant portion of Funafuti's electricity needs. This project, funded through a combination of government resources and international grants, is set to enhance energy security and drastically cut carbon emissions.

From solar rooftops and the Off-grid sola-powered Capacitive Deionisation (CDI) systems to the pioneering floating solar PV with 100kW. innovative solutions like floating solar panels (a first for the PICs) and raised solar installations are being embraced in Tuvalu as the ...

The installation of Tuvalu's inaugural 100.28kWp Floating Solar Photovoltaic System (FSPV) consists of a total of 184 x 545W Sunergy solar panels with a solar floating mounting system. Through this new FSPV system 174.2MWh of electricity will be generated each year, meeting two percent of Funafuti's annual energy demand.

The installation of Tuvalu's inaugural Floating Solar Photovoltaic (FSPV) system has been successfully completed, with this cutting-edge system seeing 184 solar panels positioned on Tafua Pond in Funafuti.

In Funafuti, a small pond bordered by pig pens is now home to an innovative renewable energy pilot program, floating solar panels. Tuvalu Energy Corporation General Manager, Mafalu Lotolua says the project is a response to the struggle to find space to install solar panels on the atoll.

The installation of Tuvalu's inaugural Floating Solar Photovoltaic (FSPV) system has been successfully completed, with this cutting-edge system seeing 184 solar panels positioned on ...

At the end of Funafuti International Airport's runway 21, a small roadway juts into the lagoon, making a path towards a pontoon of floating solar panels. About 2% of the atoll's annual power needs will be harnessed with this clean energy solution funded by the Asian Development Bank.

Tuvalu bulk solar panel

Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location.

Infratec has installed 196 solar panels on the roof of the new Tuvalu Fisheries Department HQ on the main atoll of Funafuti, giving the building 73.5kW of its own renewable energy generation, plus 220kWh of battery storage.

In January 2020, Infratec completed the commissioning of a 73.5kW rooftop solar panel-battery storage project on the Tuvalu Fisheries Department building in Funafuti. The NZ Ministry of Foreign Affairs and Trade funded project was the first to combine solar generation and battery storage on the island.

The installation of Tuvalu's inaugural 100.28kWp Floating Solar Photovoltaic System (FSPV) consists of a total of 184 x 545W Sunergy solar panels with a solar floating mounting system. Through this new FSPV system 174.2MWh of electricity will be generated each year, meeting ...
