

Tuvalu zola solar arusha

ZOLA Electric builds distributed solutions that deliver clean, affordable, reliable 24/7 power for rural or urban settings, home or business, on- or off-grid. ZOLA provides our customers with a steady electricity supply in any situation.

Zola is an adaptation to the Swahili word "sola" (solar) and will serve as the brand of the company's operations in Rwanda and Tanzania and evolve into a pan African brand as Off-Grid Electric expands across the continent.

Zola Electric has already begun rolling out its solar-powered electricity services across Tanzania, bringing in an increasing range of appliances with TV next in the pipeline. When the company's regional expansion process is well established, it will start operations in other countries.

ZOLA Electric, initially founded as Off Grid Electric by Xavier Helgesen, Erica Mackey, and Joshua Pierce, started in Tanzania, where the founders saw that both off-grid and on-grid communities depended on costly and harmful energy sources, such as diesel, kerosene, and lead-acid batteries.
