

Türkiye's energy

What is Türkiye's energy strategy?

The versatile structure of Türkiye's energy strategy and its energy import dependency brings international relations into prominence in this field. One of the main goals of Türkiye's energy strategy is to diversify routes and resources to strengthen its energy supply security.

What is the target for battery storage in Türkiye?

The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053. The program is innovative for its use of country systems and for building a platform to diversify private financing.

What is the international dimension of Türkiye's energy strategy?

The fundamental elements that constitute the international dimension of Türkiye's energy strategy are:
1. To ensure the diversification of routes and resources in the supply of oil and natural gas, taking into account the increasing demand and import dependency, 2. To contribute to regional and global energy security, 3.

Why does Türkiye need a nuclear power plant?

Türkiye aims to add nuclear power into its energy mix in order to decrease negative environmental effects of energy production, to meet its energy demand increase as well as to reduce its energy import dependency. To this end, construction of Akkuyu nuclear power plant (NPP) is underway.

How much did Türkiye pay for electricity generation in 2023?

Türkiye paid a total of \$3.7 billion USD for imported coal for electricity generation in 2023. Türkiye added 2 GW of solar power capacity in 2023, increasing solar's share of total electricity generation from 4.9% in 2022 to 5.7% in 2023.

How will Türkiye improve energy security?

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053.
