

Türkiye solar power naija

What is the Solar Power Naija programme?

The Solar Power Naija Programme (SPN) is an initiative launched by the Federal Government of Nigeria (FGN) as part of the Economic Sustainability Plan (ESP) to achieve the roll out of 5 million new solar-based connections in unserved and underserved communities and businesses not connected to the grid.

What is solar power Naija (SPN)?

We do this work in partnership with our funder, the US government's initiative. On 9 April, the vice president of Nigeria, Mr. Oluyemi Osinbajo, kicked off the rollout of a mass solar connections programme - tagged 'Solar Power Naija' (SPN) - at national scale by launching the pilot in the Jankefe community in Jigawa State.

How much does a solar generator cost in Nigeria?

A solar generator with the capacity to power all of those devices is barely available on the market and inaccessible to the majority of low- and middle-class Nigerians. A high-capacity solar generator can cost well above 400,000 naira (\$972.05). By comparison, the monthly minimum wage in Nigeria is 30,000 (\$72.90) naira.

Do Nigerians have solar power?

For example, Nigerians are likely to own a solar-powered torchlight, solar-powered fan and perhaps solar-powered refrigerator, but each comes with its own solar plate and energy generation unit, rather than plugging into a single solar generator capable of powering an entire house and every appliance.

What is the import duty on solar panels in Nigeria?

0% import duty on solar panels under HS Code 8541, but when these panels are imported with other systems as is the case with SHS, they will be classified under 8502 and attract a 5% duty. All other solar components (bulbs, fans, TVs) can attract up to 20% import duty. All licensees shall give first consideration for goods made in Nigeria.

How many megawatts of electricity can a solar system generate in Nigeria?

A 2019 report (PDF) by the director-general of the Energy Commission of Nigeria estimated that if one percent of Nigeria's land area were to be covered with a solar technology of five percent efficiency, about 333,480 megawatts of electricity could be generated, which is "more than enough for the country".

According to the REA, the Solar Power Naija program is expected to increase around \$15 million (~N7 billion) in tax revenues and \$10 million in import substitution, annually. The program will expand energy access to 25 million Nigerians, facilitating the growth of the local manufacturing and assembly industry and creating nearly 250,000 new ...
