What is a BYD battery control unit & base?

The BYD Battery Control Unit and Base (BYD-HVM/HVS-H-BCU) is a critical component of the BYD Battery-Box Premium HVM and HVS energy storage systems. It is integral to maintaining, monitoring, and controlling the system's overall performance and operation, ensuring reliable and efficient energy management.

What is a battery-box premium HVS & HVM?

The Battery-Box Premium HVS&HVM is used as a connected battery for the intermediate storage of excess PV energy in an inverter system. There are two types of battery modules, HVM and HVS. The HVM module has two stripes printed on it, and the HVS one has one stripe.

Which BCU / HVM module sets are compatible with KACO hybrid inverters?

BYD Battery-Box Premium BCU+Base unit contains the base, cover (BCU-control device) and wall bracket. BYD Battery-Box Premium HVS /HVM module sets are compatible with: Kaco Hybrid Inverters. More information:

The BYD HVS/HVM range is built up using this battery base and control unit (BMU), and then adding modules to the system. One base/BMU is required for HVS systems between 5.1kWh and 12.8kWh. One base/BMU is required for HVM systems between 8.3kWh and 22.1kWh. For multiple stack in parallel, multiple base/BMU units are required.
