

# UK solar power investment

How much energy does the UK generate from solar?

The UK generated 13.5 terawatt hours from solar last year -- about 4.3 per cent of total electricity generation -- and there is at present capacity for 15 gigawatts, according to trade body Solar Energy UK. The government's energy security strategy aims to deliver a fivefold increase to 70GW by 2035.

What will funding do for the UK's energy sector?

Funding will accelerate the delivery of clean, cheap, low-carbon electricity to families and businesses, generated by renewable energy technologies such as wind turbines and solar panels. Families across the country have suffered during the cost of living crisis, as the UK's over-reliance on fossil fuel markets was exploited by Putin.

How much do solar panels cost in the UK?

According to the Energy Saving Trust, the average solar panel system in the UK is 3.5kWp, with an overall average cost of £7,000. That can rise to as much as £9,000 for a 5kWp system if you have a larger home. These figures represent the total cost, including the panels themselves and the installation costs, which can be substantial.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.
