Can Ukraine recover power from a decentralized energy system?

Whatever the future, the decentralized nature of some clean energies, in particular wind and solar, has allowed Ukraine to quickly restore power in ways that would be impossible with Ukraine's more traditional energy sources, such as coal-fired power plants.

What is the share of renewables in energy in Ukraine?

The share of renewables within energy in Ukraine is less than 5%. : 27 In 2020 10% of electricity was generated from renewables; made up of 5% hydro, 4% wind, and 1% solar. Biomass provides renewable heat. : 35

Should renewables take centre stage in the reconstruction of Ukraine's electricity system?

In their study, the researchers explain why renewables should take centre stage in the reconstruction of the Ukrainian electricity system. Using detailed maps, they show the situation before the war as well as the extent of the destruction and the potential for solar and wind energy.

What type of energy does Ukraine use?

Energy in Ukraine is mainly from gas and nuclear, followed by oil and coal. Ukraine has a diversified energy mix, and no fuel takes up more than a third of the country's energy sources. Most gas and oil is imported, but since 2015 energy policy has prioritised diversifying energy supply.

What can Russia's research results tell us about Ukraine's energy infrastructure?

The research results can serve as a scientific basis for selecting specific energy projects and rebuilding the country's energy infrastructure. One of the main targets of Russia's ongoing attacks on Ukraine is the energy infrastructure.

What is Ukraine's energy policy?

Ukraine has a diversified energy mix, and no fuel takes up more than a third of the country's energy sources. Most gas and oil is imported, but since 2015 energy policy has prioritised diversifying energy supply. The coal industry has been disrupted by war, and as of 2024 over 70% of electricity generation is nuclear.

With favorable federal tax incentives and broad market adoption, battery energy storage (BESS) deployment will accelerate in most energy markets. Redeux has the expertise to site and engineer BESS projects, secure permits and interconnection agreements, and to assess power offtake options - including bilateral agreements and merchant tariffs.

Redeux Energy, a utility-scale solar and storage project developer, announced the sale of a hybrid solar and energy storage project to Scout Clean Energy, a renewable energy project developer. The project includes a 200 MWdc solar and 40 MW/160 MWh, four-hour battery energy storage project. The hybrid project will
